The Red Stag hunting season occurs from March till June, but the best time is during the rut known in Argentina as "The Brama", from March thru May with mid of March to mid of April being the peak of the roaring season.

The huge estancias with 2 areas covering 10.000 ha & 13.000 ha is entirely un-fenced and hunters typically encounter several herds of deer throughout the day. This is a hunt on horseback!! Each hunter is accompanied by one of our guides, with an intimate knowledge of the terrain. The rough terrain is only accessible by horses and you need to be prepared to ride between 6-8 hours every day. You will be departing the lodge well before dawn. The hunting party will be accompanied also by a gaucho (Wrangler), who will take care of the horses while you are stalking with the guide.

During the 5 day hunt you will have different possibilities on huge trophies – so you can select carefully the stag you want. There is also one management stag included in the package (not exportable) which gives you a bag of two stags during your hunt.

The accommodation is in an old traditional, warm and cozy farmhouse with nice rooms and attached bathrooms, living & dining rooms with roaring fireplaces and an outdoor BBQ place. The lodge offers gourmet dining with Argentina's famed beef and fine wines, traditional asados (BBQ) and delicious desserts – Maid and laundry service.

Beside of the stag hunting you can also add 1-2 days of fly fishing – most of my clients do it, and they all liked the experience of a 2-day fishing adventure with one night sleeping at the river...
